|-------------------------------------------|------------------------------------------|---------------------------------------------|

Senior software engineer with 7+ years delivering enterprise-scale mobile and full-stack solutions used by thousands of users. Specialized in Flutter, fintech, digital banking, payment systems, and cross-platform architecture. Experienced leading engineering teams, managing production releases, coordinating cross-functional stakeholders, and delivering secure, scalable applications from concept to production. Passionate about software architecture, engineering excellence, AI-assisted development, and building products that solve real-world business problems.

## CORE COMPETENCIES

|                         |                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------|
| Mobile & Cross-Platform | Flutter · Dart · Kotlin · Swift · Android · iOS                                         |
| Backend & API           | Laravel · PHP · REST APIs · WebSocket · Authentication                                  |
| Frontend                | Vue.js · Nuxt · TypeScript · Tailwind CSS                                               |
| Database & Real-Time    | PostgreSQL · MySQL · Firebase · Push · Live Streaming · Voice/Video                     |
| DevOps & AI             | Git · CI/CD · GitHub Copilot · Claude Code · OpenAI Codex                               |
| Domain Expertise        | Fintech · Digital Banking · Payments · KYC · VISA Card Services · Exchange · E-Commerce |

## PROFESSIONAL EXPERIENCE

**AIBODIA Technology Co., Ltd** 2022 – Present  
 · Mobile Team Lead / Senior Flutter Engineer

### LEADERSHIP

- Led the mobile engineering team throughout the complete software development lifecycle across multiple enterprise financial platforms
- Coordinated developers, QA, backend engineers, designers, product owners, and external banking partners
- Planned releases, sprint execution, code reviews, and technical delivery for production-grade financial applications

### ARCHITECTURE

- Designed scalable Flutter architecture for enterprise financial platforms serving 70,000+ active customers
- Improved maintainability through reusable components, modular design patterns, and clean separation of concerns
- Led technical decisions for complex integrations including KHQR, Bakong, VISA, and real-time payment processing

### ENGINEERING & DELIVERY

- Delivered secure mobile banking applications with payment integration, KYC workflows, card services, and financial features
- Implemented KHQR and Bakong payment systems, VISA card provisioning, secure authentication, and transaction monitoring
- Optimized application performance, reduced crash rates, and improved build pipeline reliability

### PRODUCTION & OPERATIONS

- Managed production releases, monitored system health, and coordinated hotfix deployments with zero-downtime targets
- Worked closely with QA, DevOps, and backend teams to maintain production reliability for financial systems
- Established incident response processes and release validation checklists adopted across the engineering org

## EARLIER EXPERIENCE

**IG International Group** · Flutter Developer 2021 – 2022  
 Built a real-time stock exchange platform with WebSocket-powered market data feeds and a concurrent messaging application handling thousands of active users. REST APIs, GetX, MVC, Firebase.

**KOFI** · Flutter Developer 2020 – 2021  
 Developed a full e-commerce platform (Konfulon) with payment gateway integration, voice calling, invoice management, and live activity tracking. MVVM + Provider architecture.

**SoftPoint AutoID** · Flutter Developer 2019 – 2020  
 Built a multi-tenant POS system and restaurant management suite deployed across food courts — ordering, inventory, analytics, and daily business operations.

**DigitalSky Multimedia** · Software Developer 2018 – 2019  
 Delivered the MOI New Cambodia document management and training system for the Ministry of Interior. Requirements analysis, full-stack development, and workflow automation.

— PRODUCTION DELIVERIES

**DV Pay** AIBODIA Technology MOBILE TEAM LEAD

- Flutter mobile banking platform serving thousands of active customers — dual-currency KHQR, Bakong account linking, VISA card provisioning, KYC workflows, merchant services, and secure transaction flows with biometric authentication
- Led V2 redesign of the mobile experience, improving QR payment reliability, balance refresh, failed-transaction recovery, and release readiness for production financial systems

**Tech:** Flutter, Bloc/Cubit, Dio, Bakong, Secure Storage, Localization (KH/EN/ZH/VN/TH)

**HTP Mobile Financial** AIBODIA Technology MOBILE TEAM LEAD

- Financial services app for card management, top-up payments with countdown states, QR transfers, KYC, favorites, and transaction workflows
- Refined socket event handling, push notification reliability (Pushy), unread badge states, maintenance broadcasts, and force-logout edge cases; prepared Shorebird hotfix support, App Store export settings, and AAB/APK release automation

**Tech:** Flutter, Bloc/Cubit, WebSocket, Pushy, GoRouter, Shorebird

**Chat & Audio Call Package** DR Tech SENIOR FLUTTER DEVELOPER

- Flutter messaging app and reusable audio call package for internal customer service workflows — text, media, file sharing, voice messages, and Azure Communication Services-powered audio calls
- Delivered mobile and tablet screens from UX requirements with platform-specific audio behavior

**Tech:** Flutter, Azure ACS, WebSocket, Dart

**Stock & Coin Exchange** DR Tech SENIOR FLUTTER DEVELOPER

- Real-time market data apps with live price listings, buy/sell execution flows, transaction records, invoice management, issue reporting, and iOS Live Activity for native status visibility
- Created dual architecture patterns (GetX/MVC + BLoC/API Manager) for different exchange products

**Tech:** Flutter, BLoC, GetX, Dio, WebSocket, iOS Live Activity

**KOFI E-Commerce** IG International Group FLUTTER / VUE DEVELOPER

- Production e-commerce app for mobile and tablet with product listing, checkout, and local payment integration (ABA PayWay, Acleda XPay)
- Managed TestFlight release cycles with Firebase Crashlytics monitoring

**Tech:** Flutter, GetX, MVC, ABA PayWay, Acleda XPay

**KONFULON E-Commerce** IG International Group FLUTTER / VUE DEVELOPER

- Full e-commerce platform with product listing, checkout, favorites, promotions, and payment gateway integration
- Client-facing delivery from requirements gathering through staging and production deployment

**Tech:** Flutter, Provider, MVVM, REST APIs

**POS, Restaurant & Food Delivery** SoftPoint AutoID FLUTTER DEVELOPER

- Suite of mobile apps for restaurant operations, food court management, and delivery workflows — order handling and inventory tracking
- Mapped POS workflows from operational requirements into production-ready mobile interfaces

**Tech:** Flutter, POS Systems, QA Automation

**MOI New Cambodia** DigitalSky / OneTV SOFTWARE DEVELOPER

- Mobile application for the Ministry of Interior, Cambodia, built from requirement analysis and workflow planning
- Delivered ongoing product improvements aligned with business goals and citizen feedback

**Tech:** Mobile, Business Systems, Workflow Automation

**Document Mgmt & HR Training** DigitalSky / OneTV SOFTWARE DEVELOPER

- Internal document management system and online HR training platform for organizational workflows
- Built, maintained, and enhanced based on evolving operational requirements and user feedback

**Tech:** Document Systems, Training Platforms, Business Workflows
